

# Twig Discovery Pro With Man Down Alert

Twig Discovery Pro with Man Down Alert brings the emergency messaging to next level from user operated alarm button that is standard feature in all Twig handsets. Alert will launch emergency cycle that makes automatic call and sends position to predefined numbers in case the user is unable to do manual alarm. Alert is send when predefined parameters are met on in-built accelerometer.

- Emergency cycle starting automatically
- Emergency message via SMS according to DIN0825
- Dedicated emergency tones & displays gives possibility to totally loud & totally silent alert
- Ability to use only motion based information to trigger alert\*
- Text on the emergency message to inform cause of alert
- Alarm on horizontal or vertical change included with movement detection
- Adjustable movement detection
- Temporary disabling when e.g. crawling
- Possibility to prevent user to turn off
- No alarm when connected to charger
- Periodical beep tone for locating unconscious person
- All Twig Discovery Pro telematics functions e.g.
  - Twig SOS with dedicated alarm button
  - Tracking
  - Geofencing
  - Automated status messages
  - UI lock
  - Authorisation methods
  - Assistance call
- Options to add full navigation or raster maps application\*\*
